

## Queens Road Funds and FPA Announce Strategic Partnership

CHARLOTTE, NC, August 4, 2020—Bragg Financial Advisors, Inc, advisor to the Queens Road Funds (Queens Road), is pleased to announce a strategic partnership with First Pacific Advisors, LP (FPA). Pending board, shareholder and regulatory approval, the Queens Road Small Cap Value Fund and FPA Capital Fund intend to merge to form the FPA Queens Road Small Cap Value Fund.

The partnership agreement between Queens Road and FPA intends to name Steve Scruggs as the portfolio manager of the merged funds. Scruggs has served as the portfolio manager of the Queens Road Small Cap Value Fund since inception in 2002. Scruggs will also serve as the portfolio manager of the FPA Queens Road Value Fund, a large cap strategy which he has managed since 2004. There will be no changes to his fundamental investment strategy and process. The agreement further intends for FPA to provide fund administrative support and marketing for the FPA Queens Road Funds and institutional separate accounts.

Additionally, the FPA Queens Road Funds partnership agreement expects to offer an institutional class of shares with significantly lower pricing. The agreement proposes offering the FPA Queens Road Small Cap Value Fund institutional share class at .89% as compared with 1.18% for the current share class. The agreement proposes offering the FPA Queens Road Value Fund institutional share class at .65% as compared with .95% for the current share class. The new institutional pricing will place the funds in the “Below Average” Morningstar fee group in their respective institutional share class categories.

FPA and Queens Road share a common value-oriented investment philosophy, prudently seeking superior long- term risk-adjusted returns. In addition, both firms are 100% employee-owned, and principals at both firms invest their capital alongside shareholders in the strategies they manage and are willing to limit the size of the portfolios for the benefit of investors.

“We are fortunate to partner with such a like-minded firm with a long history of investing success. Steve Scruggs and his team have added significant value for their shareholders for more than 18 years and we have every expectation that will continue,” said FPA Managing Partner Steven Romick.

Mr. Scruggs commented, “We are excited about our partnership with FPA and think it is a great match given the alignment of our two firms. We are long-term investors. Our company has been in business since 1964 and we have managed the Queens Road Funds for over 18 years. During our tenure as managers of the Queens Road Funds, we declined numerous offers from other firms who wished to partner with us. But when FPA suggested working together, we were immediately interested. We have followed FPA for several decades, and similarly embrace a long-term, value-oriented approach, capacity discipline, and shareholder focus.”

## Queens Road Funds and FPA Announce Strategic Partnership

Queens Road Small Cap Value (QRSVX) is rated five-stars overall by Morningstar in its Small Value category and has beaten its Russell 2000 Value benchmark net of all expenses (as of 6/30/20) by approximately 200 basis points per annum since its inception in 2002. The Fund has received a Gold Morningstar Quantitative Rating. Queens Road Value (QRVLX) is rated four-stars overall by Morningstar in its Large Value category and has beaten its S&P 500 Value benchmark net of all expenses (as of 6/30/20) since its inception in 2002. Queens Road Value also has received a Gold Morningstar Quantitative Rating.

The agreement further anticipates that the Queens Road Funds Board of Trustees will recommend to shareholders that both Queens Road Funds move to the FPA Funds platform, with the Board of Trustees of the FPA Funds elected as trustees of the Queens Road Funds, FPA appointed as Advisor, and Bragg appointed as Sub-Advisor. The transaction is subject to all required regulatory, FPA Funds Board and Queens Road Funds Board and shareholder approvals. If approved, the transaction is expected to close in Q4 2020.

It is expected that the Board of FPA Capital Fund will recommend to shareholders that FPA Capital Fund reorganize into the Queens Road Small Cap Value institutional class once that Fund's move to the FPA platform is approved by shareholders. As a result, FPA Capital Fund shareholders would have the Bragg team managing the portfolio, and would benefit from the Queens Road Small Cap Value institutional class' 0.89% expense cap, compared with FPA Capital Fund's expense ratio of 0.92% for the year ended March 31, 2020. Until the transition is complete, Daniel D. Kaplan, the lead analyst on the FPA Capital Fund investment team, will serve as the portfolio manager of FPA Capital Fund with oversight provided by FPA's Management Committee.

Investments, including investments in mutual funds, carry risks and investors may lose principal value. Capital markets are volatile and can decline significantly in response to adverse issuer, political, regulatory, market, or economic developments. It is important to remember that there are risks inherent in any investment and there is no assurance that any investment or asset class will provide positive performance over time. Value style investing presents the risk that the holdings or securities may never reach our estimate of intrinsic value because the market fails to recognize what the portfolio management team considers the true business value or because the portfolio management team has misjudged those values.

In addition, value style investing may fall out of favor and underperform growth or other style investing during given periods. Non-U.S. investing presents additional risks, such as the potential for adverse political, currency, economic, social or regulatory developments in a country, including lack of liquidity, excessive taxation, and differing legal and accounting standards. Non-U.S. securities, including American Depository Receipts (ADRs) and other depository receipts, are also subject to interest rate and currency exchange rate risks. Please refer to each fund's prospectus for a complete overview of the primary risks associated with each fund.

## Index and Other Definitions

Index returns do not reflect transactions costs, investment management fees or other commissions, fees and expenses that would reduce performance for an investor. An investor cannot invest directly in an index.

**Russell 2000 Value** index is a subset of the Russell 2000 index, a small-cap stock market index of the smallest 2,000 stocks in the Russell 3000 Index. The Russell 2000 Value index is composed of small- capitalization U.S. equities that exhibit value characteristics.

**S&P 500 Value** index measures value stocks using three factors: the ratios of book value, earnings, and sales to price. S&P Style Indices divide the complete market capitalization of each parent index into growth and value segments. Constituents are drawn from the S&P 500®.

**Morningstar Quantitative Rating™** consists of: (i) Morningstar Quantitative Rating (overall score), (ii) Quantitative Parent pillar, (iii) Quantitative People pillar, and (iv) Quantitative Process pillar (collectively the "Quantitative Fund Ratings"). The Quantitative Fund Ratings are calculated monthly and derived from the analyst-driven ratings of a fund's peers as determined by statistical algorithms. Morningstar, Inc. calculates Quantitative Fund Ratings for funds when an analyst rating does not exist as part of its qualitative coverage.

## Queens Road Funds and FPA Announce Strategic Partnership

Morningstar Quantitative Ratings are intended to be comparable to Morningstar's Analyst Ratings for open-end funds and ETFs, which is the summary expression of Morningstar's forward-looking analysis of a fund. The Morningstar Analyst Rating is based on the analyst's conviction in the fund's ability to outperform its peer group and/or relevant benchmark on a risk-adjusted basis over a full market cycle of at least 5 years. Ratings are assigned on a five-tier scale with three positive ratings of Gold, Silver, and Bronze, a Neutral rating, and a Negative rating. Morningstar calculates the Morningstar Quantitative Rating using a statistical model derived from the Morningstar Analyst Rating that its fund analysts assign to open-end funds and ETFs. For more information, please go to <https://shareholders.morningstar.com/investor-relations/governance/Compliance--Disclosure/default.aspx>.

The Morningstar Quantitative Rating™ should not be used as the sole basis in evaluating a fund. Morningstar Quantitative Ratings involve unknown risks and uncertainties which may cause Morningstar's expectations not to occur or to differ significantly from what they expected.

**The Morningstar Rating™** for funds, or "star rating", is calculated for managed products (including mutual funds, variable annuity and variable life subaccounts, exchange-traded funds, closed-end funds, and separate accounts) with at least a three-year history. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product's monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. The Overall Morningstar Rating for a managed product is derived from a weighted average of the performance figures associated with its three-, five-, and 10-year (if applicable) Morningstar Rating metrics. The weights are: 100% three-year rating for 36-59 months of total returns, 60% five-year rating/40% three-year rating for 60-119 months of total returns, and 50% 10-year rating/30% five-year rating/20% three-year rating for 120 or more months of total returns. While the 10-year overall star rating formula seems to give the most weight to the 10-year period, the most recent three-year period actually has the greatest impact because it is included in all three rating periods.

Through June 30, 2020, the Queens Road Small Cap Value Fund was rated five stars against the following numbers of funds in the Small Value Category for each of the following time periods: 413 funds in the last three years, 373 funds in the last five years, and 258 funds in the last ten years. **Past performance is no guarantee of future results.**

Through June 30, 2020, the Queens Value Fund was rated against the following numbers of funds in the Large Value Category over the following time periods: four stars against 1,109 funds in the last three years, five stars against 970 funds in the last five years, and four stars against 703 funds in the last ten years. **Past performance is no guarantee of future results.**

### Morningstar Category

Small-value portfolios invest in small U.S. companies with valuations and growth rates below other small-cap peers. Stocks in the bottom 10% of the capitalization of the U.S. equity market are defined as small cap. Value is defined based on low valuations (low price ratios and high dividend yields) and slow growth (low growth rates for earnings, sales, book value, and cash flow).

Large-value portfolios invest primarily in big U.S. companies that are less expensive or growing more slowly than other large-cap stocks. Stocks in the top 70% of the capitalization of the U.S. equity market are defined as

## Queens Road Funds and FPA Announce Strategic Partnership

large cap. Value is defined based on low valuations (low price ratios and high dividend yields) and slow growth (low growth rates for earnings, sales, book value, and cash flow).
